

Stonework repairs at St Mary de Haura

Stonework repairs were identified in 2023 after the five yearly inspection report by our architect as needing to be done within two years to maintain the fabric of the church. **We were fortunate to be successful in our application to the National Churches Trust and the Wolfson Foundation to be given grants of £8,000 and £5,000 respectively**, which enabled the necessary work both internally and externally to go ahead this year.

While the scaffolding was up, we took advantage to inspect gutters and other areas not usually accessible and to do any other minor repairs. We are extremely grateful to the National Churches Trust and the Wolfson Foundation whose grants allowed the work to go ahead.
